

THE STOP-DOING LIST

What are you done doing?

List the tasks that eat your week. Count what each one costs you. Then decide where it goes. Nothing stays on your plate by default.

01 List it

Every recurring task you'd hand off tomorrow if you could.

02 Count it

Times a month x minutes each, divided by 60 = hours a month.

03 Sort it

Check one: Drop, Delegate or Automate. Page 2 has the tests.

TASK	TIMES / MO	MIN EACH	HRS / MO	DROP	DELEGATE	AUTOMATE
Example: retyping invoices into the spreadsheet	20	10	3.3	☐	☐	☒
				☐	☐	☐
				☐	☐	☐
				☐	☐	☐
				☐	☐	☐
				☐	☐	☐
				☐	☐	☐
				☐	☐	☐
				☐	☐	☐
				☐	☐	☐
				☐	☐	☐
				☐	☐	☐
				☐	☐	☐
				☐	☐	☐

TOTALS

Drop HRS	Delegate HRS	Automate HRS	Hours a month back HRS
--	--	--	--

DROP · DELEGATE · AUTOMATE

Every task goes somewhere.

Run each task through these questions in order. Stop at the first yes.

DROP**Could it stop without anyone noticing?**

If a customer, an employee or the bank wouldn't notice for a month, stop doing it. Try it for 30 days. You can always bring it back.

DELEGATE**Does it need judgment, just not yours?**

It matters, and it takes a person, but that person doesn't have to be you. Write one name next to it. Not a team, not "the office."

AUTOMATE**Is it the same steps every time?**

Same trigger, same steps, same result: copying data between systems, reminders, routine reports, follow-ups. A system should be doing this, not a person.

ALL NO?

Then it's yours. Only you can do it, and it's worth your hour. It comes off this list and stays on your plate, on purpose this time.

THIS WEEK**Move one task out of each column.**

Drop I'm stopping: _____

Delegate I'm handing to (name): _____

Automate I want a system for: _____

Long Automate column?

That's the work we build. Bring this sheet to a fit call and we'll go through it with you.
